## ABSTRACT:

PURPOSE: To secure the inside partition seal a liquid container and surely mounting a filter element with a few members by using the liquid container to make the filtering normal and make the maintenance advantageous.

CONSTITUTION: A device is used for mounting a filter element 1 in a filter element casing 9, which is held while being sealed on its outside wall with mounting members 21, that are connected to an inside partition 17 of the container 3 by sealing connection. This sealing connection has a sealing element 35 inserted between the sealing surfaces of the mounting members 21 and the inside partition 17, and fixing members 31, 35 located at mutually separated positions of the inside partition 17 to fix the mounting member.
